INDUSTRIAL

PERMO buildings are excellent for industrial and commercial uses.

We deliver a hassle free prefab structure that meets your requirements. Businesses are turning to PERMO when it comes to reliability and quality.

PERMO buildings can be used in many applications: workshops, garages, showrooms, warehousing facilities, airplane hangars, and construction sites. That is just to name a few.

While practical it could be visually pleasing too; a vast assortment of colors is available.

PERMO is the new trend at great value.

BENEFITS

- Easy and quick installation
- Energy savings; natural light
- Low maintenance
- Clear span; maximizing space
- Competitive price

PUBLIC WORKS

Purchasers must solve storage problems while reducing costs and still getting a high standard product

Municipalities are buying PERMO buildings to protect their snow removal and de-icing equipment and stocking abrasives.

They are suitable and simple when covering an ice rink. Furthermore, it will allow for a recreational site all year round once the rink boards are taken down.

The environment of waste management facilities can be kept safe and clean with a PERMO building.

MINING

One of the world's most global industries have benefited from investing in a PERMO dome.

They can be relocated; an easy-to-handle construction allowing operations at a smooth pace.

Built to resist demanding environments; your heavy machinery will be kept in good condition under our membrane covered structures.

Our buildings are used for storing salt, graphite, aggregates, construction materials, iron balls and the list goes on.

You have a need; we have the building solution for you.

FORESTRY

PERMO structures are the answer to a more diverse and dynamic industry.

Our buildings will enable you to protect and perform effective maintenance on your machinery, equipment, tools and parts. They are spacious and key when it comes to quick installation.

A fast storage solution for products such as wood charcoal, wood pellets, posts, wood shavings, logs, forest biomass and much more.

If more space is needed, that is not a problem. You can expand in length your PERMO building.

Our buildings range from 30' to 160' in width and in any length required. Research the different profiles available on our web site. Many features that distinguishes us from others.

The structural capacity of the arches depends on the building's intended use (low risk or not), snow loads and the winds in the location where the building will be built.

We offer the best warranties in the industry. Our customer service is there to help you and answer all questions you may have before, while and after construction. We are known for our personal approach and we stand behind each process.

STRUCTURE

All tubes have a minimum of 50,000 psi yield strength and 55,000 psi ultimate tensile strength as their mechanical properties. The clear-span double-trussed structure has no central beam, maximizing the interior space. The tubes are coated with a minimum of 1/2 inch per square foot (150 grams per square metre) of zinc and aluminum. Other coatings are available upon request: a) Superior protection by zinc spray metallizing (99.9% pure zinc coating) b) Ultimate protection by hot-dip galvanizing (all welded parts are made of black steel and hot-dip galvanized following CAN/CSA G164-M92).

What differentiates us:

- Over 25 years experience
- Commitment for innovation and continuous improvement
- A professional team
- A personalized service
- Constant awareness of sustainable development

MEMBRANE COVER

Heavyweight fabric, meeting all industry standards, produced in a special weaving pattern to intensify thickness, flatness, abrasion resistance, and tear properties. The proprietary coating is used to enhance abrasive thickness, flex resistance, seam strength, UV resistance and longevity.

Best value for your investment!
